(54) Title: BOTTLE STOPPER

(57) Abstract: In one aspect the invention provides a bottle stopper for a wine bottle or the like, which bottle stopper comprises a body having a sealing member which sits within the neck (1) of the bottle in use and which extends radially outwardly from the body of the stopper to seal the bottle neck, the stopper further having a passageway extending upwardly therethrough to communicate with the interior of the bottle and which incorporates or communicates with a chamber within the stopper in which is housed an oxygen-scavenging medium. In a further aspect the invention provides a bottle stopper for a wine bottle or the like, which bottle stopper comprises a body having a sealing member (30, 31) which sits within the neck of the bottle in use and which extends radially outwardly from the body of the stopper to seal the bottle neck, the bottle stopper further having a mechanism for compressing the sealing member substantially axially of the stopper to expand the sealing member laterally/substantially radially of the stopper into sealing contact with the neck of the bottle.
